# PROPANE ENERGY POD

The Propane Energy Pod is a home energy package that delivers superior comfort and efficiency compared with all-electric homes. High-efficiency propane gas appliances for major applications combine for optimal energy performance unmatched by electric alternatives. The addition of a propane backup generator ensures continued performance when the power goes out.

## SPACE HEATING

Cost-efficient heating with a more comfortable and consistent warmth.

## WATER HEATING

Faster hot water with up to 50 percent cost savings compared with electric options.

## COOKING

The joy and control of cooking with gas just like the professionals.

## CLOTHES DRYING

Faster drying for up to 20 percent reduced energy use.

## FIREPLACES

Significantly more heating capacity and energy efficient than electric or wood fireplaces.

With the Propane Energy Pod, homeowners benefit from the performance, comfort, and efficiency of gas energy.
